Databases: SQL

Projects

Weather App | [Click]
- *Developed a responsive web application that provides real-time weather updates based on user input (city name).*
- *Integrated the OpenWeatherMap API to fetch current weather data including temperature, humidity, wind speed, and weather conditions.*
- *Implemented error handling for invalid city inputs and network issues.*

Portfolio Webbsite | [Click]
- *A fully responsive and modern personal portfolio website built using HTML, CSS, JavaScript, and modern frameworks. It features smooth navigation, section-based scrolling, and a clean UI to showcase my skills, projects, contact details. Designed to provide an engaging user experience and optimized for both desktop and mobile devices.*

Experiences

Deloitte Australia Technology Job Simulation on Forage - July 2025
- *Completed a job simulation involving development and coding*
- *Wrote a proposal for creating a dashboard*
